Journal of Science Education and Technology

Vol. 12, No. 1 **March 2003**

CONTENTS

Haptics-Augmented Simple-Machine Educational Tools 1
Robert L. Williams II, Meng-Yun Chen, and Jeffrey M. Seaton

Developing a Better Understanding of the Relationship Between Transpiration and Water Uptake in Plants 13
Din Yan Yip

A Window on Science: Exploring the JASON Project and Student Conceptions of Science 21
David M. Moss

Scientists' Role in Educational Content Development 31
Carol A. Christian

Testing the Effect of Meat Tenderizer on Human Hair: A Class Project for Nonscience Majors 39
Marjorie A. Jones

A "Thinking Journey" to the Planets Using Scientific Visualization Technologies: Implications to Astronomy Education 43
Yoav Yair, Yaron Schur, and Rachel Mintz

The Scientist as School Teacher 51
Byron H. Waksman

Students' Achievement in Human Circulatory System Unit: The Effect of Reasoning Ability and Gender 59
Semra Sungur and Ceren Tekkaya

Evaluation of a Statewide Science Inservice and Outreach Program: Teacher and Student Outcomes 65
Kimberly H. Lott

Learning by the Sun: Observing Seasonal Declination With a Vertical Sundial 81
Judy L. Klein and Adrian Riskin

Journal of Science Education and Technology

Vol. 12, No. 2 **June 2003**

CONTENTS

Use of the Digital Camera to Increase Student Interest and Learning in High School Biology 89
Denise Tatar and Mike Robinson

Maxims to Help Understand the World: Simple Rules to Guide Learning about Geographic Complexity 97
Stephen S. Birdsall

Student Use of Internet Study Rooms for Out-of-Class Group Study in Introductory Biology 105
Phillip G. Sokolove, Gili Marbach-Ad, and Judith Fusco

Can Scientific Writing Be Creative? 115
Mehrdad Massoudi

A Conceptual Change Teaching Strategy to Facilitate High School Students' Understanding of Electrochemistry 129
Mansoor Niaz and Eleazar Chacón

Understanding Greek Primary School Children's Comprehension of Sun Exposure 135
Stylianos M. Piperakis, Vasiliki Papadimitriou, Michael M. Piperakis, and Panagiotis Zisis

Searching for Educational Technology Faculty 143
Lloyd H. Barrow

Bumble Boosters: Students Doing Real Science 149
Douglas A. Golick, Diana M. Schlesselman, Marion D. Ellis, and David W. Brooks

Developing and Sustaining K–12 School Technology Innovation through Lottery Grant Awards: A Multiple Case Study 153
Lynne McKnight Herr and David W. Brooks

Automated Testing 183
David W. Brooks, Diane E. Nolan, and Susan Gallagher

Journal of Science Education and Technology

Vol. 12, No. 3 **September 2003**

CONTENTS

Teachers' Perceptions of Teaching Environmental Issues within the Science Curriculum: A Hong Kong Perspective 187
Andre Chi-chung Ko and John Chi-kin Lee

Online Training: An Evaluation of the Effectiveness and Efficiency of Training Law Enforcement Personnel over the Internet 205
Joyce M. Schmeeckle

Small-Group Interview-Based Discussions about Diffused Shadow 261
Haim Eshach

Common Molecules: Bringing Research and Teaching Together through an Online Collection 277
Leah M. Sandvoss, William S. Harwood, Ali Korkmaz, John C. Bollinger, John C. Huffman, and John N. Huffman

Connected Chemistry—Incorporating Interactive Simulations into the Chemistry Classroom 285
Mike Stieff and Uri Wilensky

Science, Society, and Technology—Three Cultures and Multiple Visions 303
Sumit Bhaduri

Solar Village—Educational Initiative for Kids 309
Muhamad Hugerat, Salman Ilyian, Zehava Toren, and Fawzi Anabosi

Cookbook Procedures in MBL Physics Exercises 317
Brent Royuk and David W. Brooks

Can Computer Use Hurt Science Achievement? The USA Results from PISA 325
Elena C. Papanastasiou, Michalinos Zembylas, and Charalambos Vrasidas

CHEMnet—Structure, Design, and Evaluation of an Online Chemistry Course 333
Sabine Nick, Judith Andresen, Birgit Lübker, and Luzie Thumm

Journal of Science Education and Technology

Vol. 12, No. 4 **December 2003**

CONTENTS

The Teaching of Science: Content, Coherence, and Congruence 343
Rodger W. Bybee

"L Tell Me, I'll Find Out" Robert Karplus—A Science Education Pioneer 359
Robert G. Fuller

Science Background and Spatial Abilities in Men and Women 371
Sheila Brownlow, Tamara K. McPheron, and Cheryl N. Acks

The Indian Association for the Cultivation of Science: A Tortuous Tryst with Modern Science 381
John Bosco Lourdusamy

Community Building Through Electronic Discussion Boards: Pre-Service Teachers' Reflective Dialogues on Science Teaching 397
Jazlin V. Ebenezer, Frank Lugo, Beata Beirnacka, and Anton Puvirajah

Use of Computer Modeling of Site-Directed Mutagenesis of a Selected Enzyme: A Class Activity for an Introductory Biochemistry Course 413
Marjorie A. Jones, Raymond Shoffner, and Jon Friesen

Interdisciplinary Faculty Development Seminars: A Model for Learning Emerging Technologies While Developing Interdisciplinary Partnerships 421
Suzanne Amador Kane

Rethinking Course Assessment: Creating Accountability With Web-Based Tools 431
Kent J. Crippen

Growth in Students' Attitudes About the Utility of Science Over the Middle and High School Years: Evidence From the Longitudinal Study of American Youth 439
Rani George

Guidelines for Establishing Undergraduate Bioinformatics Courses 449
Jacques Cohen

Learning What It Takes to Teach Science: High School Students as Science Teachers for Middle School Students 457
Regina E. Toolin

Evaluation of Short-Term Impact of a High School Summer Science Program on Students' Perceived Knowledge and Skills 471
Kerry L. Knox, Jan A. Moynihan, and Dina G. Markowitz

BOOK REVIEW

Information Arts: Intersections of Art, Science and Technology. By Stephen Wilson 479
Reviewed by Jonathan D. Chertok

Mental Models and Computer-Based Scientific Inquiry Learning: Effects of Mechanistic Cues on Adolescent Representation and Reasoning About Causal Systems 483
Danielle E. Kaplan and John Black

Inquiry-Events as a Tool for Changing Science Teaching Efficacy Belief of Kindergarten and Elementary School Teachers 495
Haim Eshach
